Examination of Application #09/766,615

1. Claims 1-18 of application 09/766,615, filed on 26-July-2001, are presented for examination. The examiner respectfully notes that applicant did submit an amendment before the first line of the specification in the Application Transmittal Letter, which outlined the proper continuing information.

Claim Rejections under 35 U.S.C. § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2.1 Claims 1, 2, 4, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by the article authored by Rabinovich et al. (hereinafter Rabinovich), entitled *RaDaR: a scalable architecture for a global Web hosting service*.

2.2 Rabinovich disclosed the invention as claimed [p. 1552, l. 15-38], including "...how a client finds a distributor to send a request to. We rely on the DNS infrastructure to locate distributors [*claims 1, 5 and 6 preambles*]. The DNS server(s) of the hosting platform can map [*i.e. the DNS data models of claims 1, 5 and 6*] the domain names of all Web sites hosted by the system into the set of IP addresses of distributors [*claims 1, 5 and 6 steps for DNS domains*]

In re Application of: Ferguson et al.

entities, and claim 4]. In response to a client inquiry, the DNS server will send the IP address of a distributor that is the closest in the network to the client [*claims 1, 5 and 6 steps for DNS hosts entities*]. Note that this usage of the DNS service conforms to the assumption behind the existing DNS infrastructure [*claim 2*] that the mapping of DNS name into IP addresses changes slowly. (Unlike sets of replicas for a given object, the set of distributors changes infrequently.) Thus, existing caching mechanisms will keep the load on the DNS service manageable.”

Claim Objections

3. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowed Claims

4. Claims 7-18 are deemed allowable over the prior art of record at this time.

5. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
